

First visibility lunar crescent for Ramaḍān 1445 AH

Global visibility map for 10 March 2024 [Sunday]
Day of luni-solar conjunction

Astronomical New Moon: 10 March 2024, 9h 1.6m (UTC)

First visibility (•)

Longitude (°)	Latitude (°)	Lunar age (h)
-156.16	17.74	19.88
-112.14	15.79	16.89
-83.18	14.10	14.93
-68.55	13.07	13.94
-55.93	12.08	13.09

Astronomical (Brown) Lunation Number = 1252
Islamic Lunation Number = 17337
TT – UT [= ΔT] = 0.0 min

Lunar age (in hours) is given for the 'best time',
defined as the moment 4/9ths between sunset
and moonset

□ F – below Danjon limit (7°)

■ moonset before sunset

■ before conjunction (astronomical new moon)
